Yordan Yovkov Museum
The historical museum offers tourists a walk around the historical heritage of Dobrudzha - the crossroads of civilizations, where cultures from a number of regions in Southeast Europe meet. The museum boasts some 163,000 exhibits.
The historical museum of Dobrich was founded in 1953 as an institution for science, culture and education. It has collected, studied, stored and exhibited artifacts and nature samples from all over South Dobrudzha. It publishes a number of scientific and popular science books (among which the year-book Dobrudzha), and organizes international, national, and regional science forums. In 1968, the organization started Yordan Yovkov fund, which, twelve years later, was transformed into the today's specialized museum of art, drama, and ballet Home of Yordan Yovkov.
